I really wanted to like the story, but it seemed like they made it over complicated just for the sake of it. I like the story of the original Bioshock more. The gameplay of Infinite is some of the most fun I've had with a videogame...ever.

I think the story was really good and not super complicated, if you think about it for a little bit.

Spoilers below, but that should be expected anyways with such a thread title.

Booker can't live with the sins he has committed in life, like the stuff at Wounded Knee and his time with the Pinkertons and gets himself baptized to wash away those sins. He is "reborn" as Zachary Comstock and goes batshit insane with his new religious persona. Rosalind Lutece (who discovers the whole multiverse thing) helps him to build Columbia, where he can realize his new overly religious and "pure" vision of America.

He marries Lady Comstock but she cannot conceive a child. Instead of adopting some random kid, Comstock asks Lutece to open a portal into a timeline where he has a child. It just so happens to be a timeline where he didn't go through with the baptism and never became Comstock.

Also, I love the idea that the Vigors and Handyman are just replicas of Plasmids and Big Daddies. Fink talks about observing something in a tear that would help him create the Handyman, but that the process would be "irreversible". The process of creating a Big Daddy was also described as being irreversible in Bioshock 1.

He was probably observing Suchong.

This fucking game, haha.

Yeah, basically.

And the Luteces are probably bringing a new Booker into Columbia everytime you die without Liz being around to help you back up. 🇩🇪

The door in his office is just a tear.

Man I need to play this shit again.

All my problems with this game came from my own expectations. They didn't quite live up to their E3 2011 demo, the game is virtually flawless until you think about things it could have done. I guess it just wouldn't have worked to the same extreme level of polish and fluidity.

Still... incorporating the entire medium into just one line, ground breaking AI, beautiful world design, beautiful score and tremendous and unique combat... I guess that's enough for one day Ken Levine.

I had high expectations too, but Irrational met them and then some. Sure, the game could've been more, but what medium couldn't, right? I certainly didn't expect... this.

Yeah I noticed that too!

Watching the e3 2011 demo, it just seems a little more dynamic. The interaction with Elizabeth is better and well there is more of it. It still there in the game but it's a little more limited to her chucking coins to you rather than playing with the world, at least after the initial beach scene. Guess that makes sense in regards to the story though.

I just would have loved more time when you can walk around and not everyone is an enemy unless you draw first or they make yourself clear. Like when he tells the guy to get to lost and he runs off. In fact the whole scene is more dynamic than any real moment in the game. Though you do destroy a zeplin just like that, in fact you can do it at the end to but you have to be quick (I did but the core got destroyed) but in the video it appears as if its completely unscripted.

Its the same with the Handymen, I wanted them to be a little less scripted and more like the Big Daddies. As for the Songbird, well he was completely underused to the point I nearly forgot about him. We didn't have to fight him, but he should have appeared more, or at least be shown flying round the city in order to create a sense of inevitability.

Only last point - why oh why did we not get any skyline exploration. Imagine being able to go from island to island browsing the shops and looking for audio logs etc etc.

Still all these complaints are overlooking what we have, and what we have is SO fucking good.

stuff

Yeah, all those things would've been amazing. I'm not sure if open world or more exploration would've working with *this* game though. Stretching it out with optional content could hurt the narrative and pacing.

And then there's going to be some DLC, so it's entirely possible that we get more information about Songbird and Columbia. Who knows?

metalheadmax said: ↑

True, I didn't mean anything as expansive as even the original Bioshock. I just would have loved to try out the skylines in a less constrictive and combat centered scenario.

Watching all that pre-release stuff, it's pretty clear the game has had a huge number of limitations on it in order to get it all to work. The worst being the tears I think, in the demos her powers are so much more diverse like the molding of the coins to create a bomb or the

opening up new areas... In the game you really don't get anything but turrets, cover and an occasional skyhook.

I guess it's a case of baby steps instead of giant leaps into gaming's next step.

I'm loving the gameplay, it blows the original Bioshock away. The

wide open spaces are the main reason for this.

What don't you like about the gamplay?

What don't you like about the gamplay?

the gunplay is tight which is definitely a nice change, but im playing on console and vigor combos are like bleh, unless you want to keep pausing in the middle of battle you pretty much are using the same 2 vigors per firefight(unless its necessary to change due to special enemies or whatever) so it kind of either interrupts the flow of the battle or it gets slightly repetitive for a while, changing a single vigor isnt bad though but vigor combos are too fun to not do

also the other point i had was that the enemy variety is shit, but after talking to @ThatGuySien last night he reminded me that it was the same in the first one too.. i guess i was so much more in awe and stuff that i didnt notice as much.. i havent really had the equivalent of the fear and awe of fighting your first big daddy yet(and maybe i will by the end of the game?) which is something i was kind of expecting with the new environment and enemy types and stuff

dont get me wrong i fucking love the game, and maybe im the only one with these complaints..

I'm loving the gameplay, it blows the original Bioshock away. The wide open spaces are the main reason for this.

What don't you like about the gamplay?

the gunplay is tight which is definitely a nice change, but im playing on console and vigor combos are like bleh, unless you want to keep pausing in the middle of battle you pretty much are using the same 2 vigors per firefight(unless its necessary to change due to special enemies or whatever) so it kind of either interrupts the flow of the battle or it gets slightly repetitive for a while, changing a single vigor isnt bad though but vigor combos are too fun to not do

IMO they did a much better job of visually distinguishing the enemies in this game. In Bioshock 1 most of the splicers looks very similar, even though some of them were much tougher than what appeared to be normal splicers. As Infinite progresses the enemies start to look better equipped. An enemies appearance in Infinite is a good indicator of how tough they will be.

And yeah I heard playing it on consoles is sort of a drag because of the vigor switching system. I didn't have any problems on PC. I kind of agree on your point about big daddys. None of the enemies in Infinite are as memorable as the Big Daddy. I think a lot of this has to do with the mystery behind them. However, I think the Handyman is Infinite's version of the Big Daddy. Both are powerful, half-man/half-machine. While they may not be as memorable as the Big Daddies, I like the personality of the Handymen. They yell some messed up stuff at you.

I hope you didn't waste \$60 on such a short game

I hate it when people say this. I'm already playing it again. I don't spend \$60 on a game just to play it once. Infinite is easily in my top 3 shooter campaigns. I'll be be replaying this at least 2-3 times in the next month.

you hate when people say it because it's true. It's still not worth \$60 and you know it.

shelving it after a month makes it worthless imo but we're not going to see eye to eye on this

4 bucks for one hour of entertainment seems like a pretty good deal to me.
